

CHRISTOPHER AMENT

FULL-STACK ENGINEER · REACT · TYPESCRIPT · NODE.JS · C++

St. Augustine, FL | (954) 909-6199 | chrisament45@gmail.com | christopherament.netlify.app | github.com/KelseyProgrammer | linkedin.com/in/christopher-ament

Full-stack engineer who ships products end-to-end: three audio plugins launched at amentaudio.com (C++/JUCE with a TypeScript storefront), the customer platform for a licensed smart-home installation business, and client web applications — bringing that product-shipping discipline to a full-time engineering team.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Tailwind CSS, HTML/CSS, accessibility (WCAG)

Backend: Node.js, Express, MongoDB, PostgreSQL, Firebase, REST APIs, Socket.IO, Google OAuth

Audio/Systems: C++, JUCE framework, real-time DSP

Tools & Practices: Git/GitHub, Stripe payments, Netlify, Vercel, Agile/Scrum, MVC architecture

EXPERIENCE

Founder & Engineer — Ament Audio · amentaudio.com 2026 – Present

- Designed, built, and shipped three commercial VST audio plugins from scratch in **C++ with the JUCE framework**: FREECODER (spectral processor), HALATION (eight-path pitch-shifted feedback engine), and LIMINAL (threshold-based ambient effect) — all available for purchase with free trials.
- Built the e-commerce storefront in **TypeScript** — product pages, trial distribution, and bundle pricing; own the full product lifecycle from real-time DSP code to UI, marketing site, payments, and support.
- Launched the product line to market with demo content and community outreach across YouTube, Instagram, and Reddit, targeting experimental-music producers.

Founder — Ament Home & Tech Services · amenttech.com 2026 – Present

- Founded and operate a licensed and insured smart-home, security, and network installation business serving Greater St. Augustine; 5-star rated with tiered subscription care plans.
- Built the company's customer-facing web application — service catalog, booking, and care-plan sign-up — and the marketing site, handling all engineering for the business.
- Hands-on expertise in CCTV/NVR systems, network security audits, Wi-Fi/mesh architecture, and smart-home integration across HomeKit, Google, and Alexa ecosystems.

Freelance Full-Stack Developer 2019 – Present

- Deliver production websites and web applications for small-business clients, from design through deployment — including Spectral Salon (premium salon site with booking) and Crewmarket, a marketplace connecting sportfishing crews with charter work.
- Build and maintain backend APIs with Node.js, Express, and MongoDB/PostgreSQL; manage hosting, domains, and ongoing client support.

SELECTED PROJECTS

Venu (React, TypeScript, Stripe, Firebase) — Real-time, location-based event discovery platform with secure QR ticketing via Stripe and targeted push notifications through Firebase Cloud Messaging.

Pulse Clinic (React, TypeScript) — Patient portal shipped with a 5+ developer team under industry mentors; built core UI components (search, modals, theming) with accessibility-first design for assistive-technology users.

DevSync (Node.js, Express, Socket.IO, Google OAuth) — Agile project-management tool serving 100+ users with real-time task updates and in-app chat; built collaboratively with distributed sprint workflows.

EARLIER CAREER

Wire Technician · Working Musician & Guitar Teacher · Service Industry (pre-2019) — Low-voltage wiring and installation work (the technical foundation for Ament Home & Tech), a decade performing and teaching music (the domain expertise behind Ament Audio), plus customer-facing roles in kitchens and with the U.S. Postal Service.

EDUCATION

100Devs Software Engineering Program 2023 – 2024
700+ hours of intensive training in JavaScript, React, Node.js, and Agile team practices.

Santa Fe College, Gainesville, FL — Journalism studies 2009
